

Kelly Lauth has been a business strategy and management consultant for over a decade. Prior to that, she had an eclectic background covering business process improvement and custom software design, computational modelling and statistical analysis, and even graduate work on corruption in China. Kelly is currently the Chair of the Board of a Canadian BioTech and a contract strategic business consultant.

Kelly lives with her wonderful husband and her lovely, vibrant 13 year old daughter who has been living with ME for over 2 years. Building on her past advocacy work for women's health in Canada, Kelly joins the ME/FM Society of BC to help bring hope and support to the thousands of Canadians suffering, often largely alone and unheard, with this devastating illness.
